My child has had a wonderful experience during her first 6 weeks with Mathnasium. Already her math comprehension and test scores have increased dramatically. She is always happy to go to her tutoring sessions at Mathnasium as well!

Maria Tuckett

My kids both hated math prior to signing them up. They now both feel like they understand it better.

My daughters love going to Mathnasium. My husband and I decided to sign them up for the summer months in order for them to stay sharp with their math skills. One of my daughters have always excelled in Math. On the other hand, my other daughter, even though she did well in Math, lacked confidence in her math abilities. Within a few weeks of going to Mathnasium, her love for Math has blossomed to new heights. She looks forward to going to Mathnasium. The owner Brad is very pleasant and accommodating. They have wonderful tutors that are knowledgeable in the field of Mathematics. Mathnasium was supposed to be a summer fling, but it is becoming more of a serious relationship.

Mathnasium has made such a difference for our middle school daughter. She claims she still doesn't like math (according to her), but says "I understand it now." She is happy to go, and has gained confidence in her school work thanks to Mathnasium. We homeschool her, and are going to use Mathnasium as our sole Math curriculum. No more tears over math on or house! Thanksgiving Mathnasium!

Mathnasium staff not only teaches valuable math skills but builds self-esteem in a child who is struggling to keep up with peers. The calm & caring one on one support excels your child/grandchild to succeed.

Their approach is so perfect. They were really able to pinpoint what my son needs. He feels more confident in math and is now able to explain the tips and tricks they have given him which help him on his everyday math.

My son looks forward every week to learn more. In his words :” they really teach math in a way you can understand, not like at school”.They also work on a flexible schedule, which makes it easier to fit into weekly routines.

We looked for a long time for the right tutoring fit for our teen. Mathnasium's reviews were so positive that we decided to try it out for two weeks. Our daughter has done a complete turnaround from dreading math to enjoying going three times a week to the Vero Beach location. Her math skills are slowly improving, but her confidence? That changed almost overnight. We homeschool and have struggled with Math for years. Now she happily chats about what she is learning after each session. Brad and the other tutors are all excellent- she has enjoyed everyone of them. Being able to drop in has made getting there much easier than scheduling a private tutor, and the atmosphere is very professional, clean and comfortable. Although we live 2 cities away, it is worth the drive. Our daughter still dislikes most of her regular math schoolwork, but loves Mathnasium. We are considering switching to Mathnasium for her core Math curriculum. Thank you Mathnasium!
